me

Patricia Leith; Examiner.

Re: application No. 10/719,273

I've read many times your
"office action Summary"

I request that a Committee of
examiners reevaluate the patent
application.

I commend to the committee to
keep up front the following.

- 1) "Whole Grain Corn"
- 2) "Modified Whole Grain Corn"
- 3) "Modified Whole Grain Corn alone"
- 4) Consumption of modified whole grain
corn alone lowers over all blood
glucose levels
- 5) Consumption of 30 grams total in a day;
in six equal portions (5 grams) three
hours apart enhances over all
blood glucose levels at
70-110 MG/DL, 24 hrs a day.

Oh yes --- to the Committee --- I submit
narrative is much better used here
than verse (prose).

Committee: please note. Prior art. ---
Corn starch and Whole Grain Corn are not
the same. Prior art added to Corn
starch, Protein, fat & sugars --- My
art is whole grain Corn alone has
protein, oil, fiber, minerals, vitamins
and the essential Complex Carbohydrates
(See line 0018)

Committee further note: Milling of Corn is not as familiar as Patricia states.

Milling of corn can be as simple as a rock with a hole in it; a long hard stick to pound the corn in the hole of the rock until eatable. or as complex as a high speed hammer mill that can mill hundreds of bushels of corn in an hour or less and with the setting of the concave plate can mill powder fine or cracked corn for chicken feed.

My invention calls for a specific milling of the whole grain corn, made clear in Claim # 4.

Patricia I admit I should have used the term "blood glucose level controlling" in Claim # 1.

In my patent application I believe I gave permission for the Patent and Trade Mark examiner to add or even change up to two claims. You have my permission to do so now.

I pray the Committee to see the unity in "Abstract" and "Claims". Its like a single coin having two common sides.

The Power is in your hands to write "Accepted"!

May it be so, I pray.
Wm. E. Reibeling

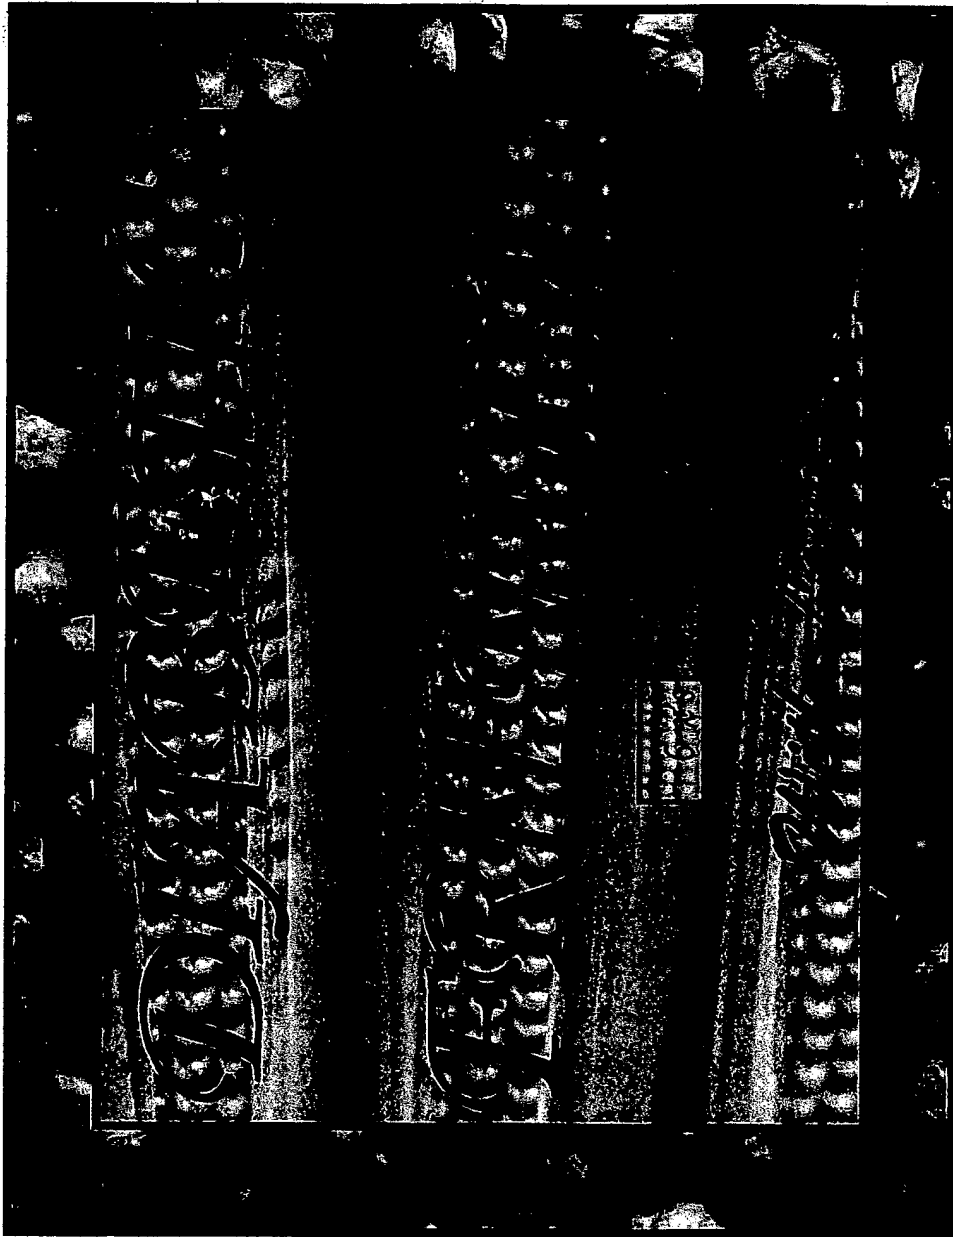

P.S.

This is what I
plan to use in
marketing the
product of the
invention.

D.R.
